

## *Meet the Grower*

# *Coloma Frozen Foods Coloma, MI*

Coloma Frozen Foods has proudly provided the food industry with the highest quality of frozen fruits, vegetables, juices, and juice concentrates for over 30 years. We provide flexible solutions for your frozen food and juice concentrate sourcing and can handle any of your 'private label' needs.

We also market food products with our own label, Nature Blessed. Nature Blessed, LLC is a wholly owned subsidiary of Coloma Frozen Foods, Inc. Our tart montmorency cherry concentrate is available in 1-quart or individual servings.

We are located in southwestern Michigan, the heart of America's "fruit-belt". Local growers are our source for premium crops to satisfy the needs of the baking industry, food service providers, retail grocery chains, and other facets of the food industry. Our close proximity to Chicago and major interstates (I-94, I-196, and I-80) allows us to distribute our products easily and cost effectively across the country.

Coloma Frozen Foods, Inc. is committed to providing quality services and products that benefit the success of our customers. We are proud to offer domestically grown fruit and vegetable products first, importing only when necessary. The mainstay of Coloma Frozen Foods, Inc is the production of food products for the industrial market. These products are primarily used in the baking industry and food service industry.

All of the industrial market products, along with other products we purchase, are available in our food service line. Currently we serve many independent and national food service customers.

Our retail products line is an extension of our food service products. These items are packaged under the Nature Blessed brand label. All our retail products include nutritional statements and UPC codes. Most of the frozen retail products are packed in 'zip lock bags'.

We also produce tart cherry, apple and blueberry juice and juice concentrate products under the Nature Blessed label or your private label.
